

RESPONSIBLE ENERGY OFFSHORE WIND FARMS MAKE A DIFFERENCE

Our business is energy

DONG Energy provides energy to more than a million customers each day. Our customers, whether we talk about large-scale companies, the public sector or households, all depend on a reliable energy supply in their everyday lives.

DONG Energy represents a reliable energy supply as well as a responsible use of our natural resources. Our power plants rank among the most effective and least polluting in the world and we invest heavily in developing renewable energy sources.

Profound knowledge in wind power

As a pioneer in building and operating wind farms at sea, we have amassed valuable knowledge in this field. We possess the right competencies in analysing, designing, building and operating offshore wind farms, and we use this knowledge to further optimise coming wind farms.

Horns Rev 2 – a wind farm in the North Sea

Wind power does not yet cover the total demand for energy, but by investing in big offshore wind farms DONG Energy contributes significantly to the supply of renewable energy.

Located in the North Sea, Horns Rev 2 is our next wind farm project. The wind farm is expected to produce approx. 800 million kWh each year from end 2009. This corresponds to the demand from about 200,000 households.

People matter

DONG Energy's success depends on our employees' know-how and dedication. We continuously strive to optimise and translate this know-how into the further development of renewable energy sources.

DONG Energy is one of Northern Europe's leading energy groups. We are headquartered in Denmark. Our business is based on procuring, producing, distributing, trading and selling energy and related products in Northern Europe. The company delivered revenue of DKK 41.6 billion in 2007 (approx. EUR 5.6 billion or USD 8.3 billion). DONG Energy has more than 5,000 employees. For further information, see www.dongenergy.com.
